my acquaintance with Mr. Moro's little for him, and we know that wife went back to our days as this is not true. And the fact that he

Moro after having humiliated him after so many weeks." Up to "the last moment" he was hoping for that, he said, despite everything, despite the terrible letters of despairing appeal from Mr. Moro.

Those letters, begging Mr. An-dreotti and his party to do what they knew they could not, pleading, accusing: "One thing is certain, that Mr. Moro had whatever information he had only through them [the terrorists holding him]. Any-thing he was writing was condi-uoned by this lack of information." Mr. Andreotti, who wanted to make this point clear, gave an example: "In one of the last letters.

Help in Battle **Against Locusts**

NAIROBI. June 5 (AP) — East African nations appealed today for international aid to help them com-bat swarms of locusts, the worst in a decade, which are invading the region from their Red Sea breeding

Tanzanian Agriculture Minister John Malecela, chairman of the East African Desert Locust Control Organization, said that international aid is needed as he arrived at the organization's headquarters in the Ethiopian capital of Addis Ababa.

Ethiopia has been the worst hit so far. But officials reported during the weekend that swarms had been ighted in northern Kenya.

The locusts were first sighted in Ethiopia and Somalia a month ago. Official Ethiopian radio announced today that the swarms had moved inland to the western province of Gondar where they are ravaging The radio, monitored bere, said

that regional officials had asked for medical aid and more workers to combat the swarms. Emergency landing strips have been built, the radio said, to facilitate spraying of

students" at the university.

Yes. for a long time he hoped that the terrorists who kidnapped Mr. Moro, having failed in their purpose, "which was to create a political crisis, might set free Mr. Moro after basing hamiliated him.

Moro after basing hamiliated him. They were true friends."

No Moral Freedom

In short, Mr. Andreotti said, Mr. Moro was "not in a condition of moral freedom" when he wrote the letters. The premier spoke unselfconsciously and easily about this concept, as befits a devout Catholic, a Ciceronian scholar, a man who wrote his doctoral thesis on the similarity between "positivist criminology and canonical penal law," who has presided over the re-vision of the 1929 Vatican Concordat and has written a book on church-state relations in Italy.

And he could understand the Moro family's anger and bitterness, be said, clasping his hands again: The tragedy that has befallen the family leads anyone to understand any of their positions. ." But the presence of two members of the family at the public memorial ser-vice held against their — and Mr. Moro's — wishes "showed their understanding" of his and the government's position.

Four periods as premier, 30 years of continuous public life and his own character combine to make Mr. Andreotti a man who does not display emonon. But when he was asked about the not-uncommon U.S. perception of Italy as a country crumbling under its problems, he gave a smile that was, for him.

"I've been hearing about this since the first time I came to the United States in 1954," he said. "We certainly have some hasic resources which help us to avoid collapsing when on the brink of the

It is, he said, "the many ordeals. the many sacrifices we have endured during the centuries" that give Italy its hidden strength — and, perhaps, the lack of such hardship that nourishes the discontent of Italy's youth-

Youth Unemployment

But he noted that there are very real problems for Italy's young people, in particular unemployment, and the problems make them vulnerable to the lures of radical or even terrorist groups. He said that he has talked about the unemployment problem to President Carter. who has ngreed to "send a technical mission, to Italy and help us to solve it."

He said there are three "basic problems" to be dealt with if terrorism is to be contained and ultimately defeated — the first to make public opinion understand what goes on and to deny any help o the terrorists. The second to deal with unemployment among university graduates in particular and the third to organize better and better the police and intelligence

As the conversation moved away from the weeks of Mr. Moro's captivity and his death, Mr. Andreotti seemed to relax. He even ventured a small, black joke. Asked about his most recent book, a historical novel about a Vatican minister, he smiled and said of the novel's hero. "He is killed when he was a premier, and I hope I do not meet the same end!"

Lebanon Seeks UN-Guaranteed Neutral Alliance

UNITED NATIONS, N.Y., June 5 (UPI) - Lebanon today proposed that smaller nations join un-der an umbrella of "international neutrality" and that the United Nations take over their defense with a vastly expanded peacekeeping

Ambassador Ghassan Tueni went before the UN special session on world disarmament to call for an "internationally guaranteed neu-tral society" in which "national ar-mics will remain only as tools of

mise will remain only as tools of tools security."

Mr. Tueni said that neutrality traditiunally had been the "privitege of a few" — Switzerland, Sweden, Austria — but that, with UN help, it could be expanded. He said that the defense of coun-

tries wanting to join in international neutrality would "have to be assumed by international peacekeeping forces" commanded by the United Nations and that UN social, cultural and economic agen-

creased to \$4.9 hillion, of which \$2.6 billion was in South Africa and \$2.3 billion in black Africa. "The opportunities are tremendous here," a U.S. economic analyst said. "To begin with, by getting in on the ground floor, you're going to have a foothold and product acceptance in a page of the ward. ceptance in a part of the world that's growing and getting wealthi-er. Not everyone's making money now, but they will be in 20 years."

Majorca Dockers Strike

PALMA. Majorca, June 5 (Reuters) — An indefinite strike by 300 dockworkers virtually paralyzed the port of Majorca today.

Africa's principal exports to the United States are oil, coffee and diamonds, its principal imports in diamonds, its principal imports are manufactured goods. Largely because of Nigerian oil exports to the United States. Africa enjoys a high trade surplus. It began in 1972 and hy 1976 the United States was the porting from sub-Sahara Africa \$4.8 billion more in goods that it was exporting.

A prime reason for growing US ecunomic interest in Africa is a mifor shift in the African philosophy during the last several years is governments have generally be-come increasingly pragmatic co-nomically and decreasingly fanale

ideologically.
Some of Africa's radical governments - in Guinea, Mali and the Congu. for example — are now actively encouraging Western foreign investment. Zambia and Zaire are begging for it. Even socialist Tanza-nia, which only a few years ago was fired (10)

caught in a zealous anti-capitalist campaign, is appealing to private husines to take a mure active role in the country's economy.

Mauritania nationalized its ore mines a few years ago, then two months ago put a large minority share up for sale. The first buyers Lihya and Iraq. Kenya recently held a trade fair in New York. The president of Gabon has made several trips to the United States to encourage foreign investment. One :-of the first moves of Angola's

Marxist government was to get the American oil cumpanies back to work in Cahinda. Now the oil itstallations are guarded by Cuban

"The name of the game has changed," said an American bankerin Lagos. "Africa no longer wants foreign investment for its own sake."
What it wants is investment that will help it develop, investment that will provide jobs and training and opportunities for Africans, not expairiates.

If you can accept the philoso-

phy that yours is going to be a mannerity position, that they are going to get the glory of your successes then you can generate a handsome return on your investment.

Investment in many committee can be risky. Coups d'etat, nationalization; confiscation, explusion and "Africanization" of

corruption and "Africanization" the job markets constitute a way of life in much of the continent. These is, however, reason to hope that Africa is becoming more, not less stable, despite its seemingly constant turmoil.

Africa is still conservative and Africa is still conservative and rural and slow to change, but for a man with ideas, this can be a book. As William Wood, an America and general manager of the Commercial Bank of Africa in Nairob, put it: "If everything I do that can be defined as innovative takes the convention two or three years to opposition two or three years to copy, then I've got a competitive edge that just won't quit."

Exploratory Talks Sought

U.S. Seeks New Ties With S. Yemen

By Don Oberdorfer

cal agents.

WASHINGTON, June 5 (WP) -The United States is seeking to re-pair its relations with Southern Yemen, which has been used by the Soviet Union and Cuba as a staging area for African operanons.

A four-member State Department team hopes to go to Aden later this month. Rep. Paul Findley. R-III., has disclosed. A member of the House International Relations Committee, he is one of the few Americans to have visited the coun-

try in recent years.
The People's Democratic Republic of Yemen, south of Saudi Arabia on the Arabian Sea, broke dip-lomatic relations with the United States in 1969. Its authoritorian government was described by U.S. officials last summer as one of the

international terrorism, along with Libya and Iraq,

Southern Yemen has long relied on Soviet military and civilian advisers and equipment, along with similar aid from Cuba and uther Communist-bloc countries.

The Soviet and Cuban presence increased sharply in the past year as the Russians used the port of Aden and airfield facilities in their African buildup, and after the Soviet military base in nearby Somalia was closed.

Yemeni Approval Awaited

U.S. officials say that nearly 1,000 Soviet civilian and military advisers and about the same numher of Cubans are in Southern Yemen. The internal security ripparatus of the country is reported to be under the supervision of 300 to three most important supporters of 400 East Germans.

Secretary of State Cyrus Vano told a senior Yemeni official at the United Nations last fall of the U.S. desire to undertake discussion looking toward diplomatic relations. in keeping with the Carter administration's policy of seeking ties with all nutions. Southern Yemen reportedly expressed interest, hal has not given definite approval for the proposed visit of the U.S. mission, sources said.

Rep. Findley said the U.S. team is to consist of four senior State Department officials nuthorized to discuss resumption of diplomate relations, among other matters.

A State Department official said the team, to be headed by Joseph Twinam, director of Arabian pen the "exploratory talks."

10 Years After Slaying, Friends Recall Robert Kennedy 'Spirit'

LOS ANGELES. June 5 (UPI) - Political and entertainment figures gathered last night on the eve of the anniversary of Sen. Robert Kennedy's assassination to reminisce about their friend and leader, killed 10 years ago in a hotel kitchen here.

Speaking at St. John's Episcopal Church before an audience of 1 113 15 250 - including those who had worked for Sen. Kennedy and those who had struggled with him, those who knew the man and those who knew only his reputation — they speculated about what might have been and dreamed about what still might be.

"If we've ever needed it." Gov. Edmund Brown Jr. said, "we

need now that heroic spirit that was the spirit of Robert Kennedy. He had a spirit of daring and spirit of trying even the impossible."

Actress Shirley MacLaine, a Kennedy delegate to the 1968 Democtatic coovention, spoke of "the tenderness of his heart" and sug-Non the Bested that "he molded more minds and inspired more hearts than most who served as president."

Dolores Huerta, vice president of the United Farm Workers Union, said that Sen. Kennedy was one of the few politicians who really cared about poor people, and said that there was a simple reason why the poor loved him in return.

"Rubert never said to us, 'I know what's good for you,' " she militar recalled. "Robert said to us. What do you need. What can I help

Allard Lowenstein, a U.S. delegate to the United Nations, said more that the anniversary remioded him "how much a country can mil iut: change in a decade and how inadequate nostalgia is as a substitute

Bell Ready to Defy Court To Keep Secret FBI Files

Austrian Fights U.S. Conviction On Smuggling

NEW YORK, June 5 (AP) - A wealthy Austrian manufacturer is free on \$50,000 bond pending an appeal after being found guilty to trying to smuggle a high-altitude gunsight camera out of the United states for sale to the Soviet Union, He has been sentenced to two years io a U.S. prison.

The camera was described as one of the Air Force's newest and best for aerial reconnaisance at the time that Manfred Swarovski, was ar-

rested three years ago.
Swarovski, 36, of Wattens, Austria, pleaded guilty to violating the
U.S. Munitions Control Act after a ruling that the camera could be used as evidence. He will be allowed to withdraw the plea if an appeals court upsets decides that the camera was inadmissible used as evidence, U.S. District Judge Charles Sifton set bond for Swarovski in Brooklyn pending

Authorities said that the camera was in his luggage when he was ar-rested at Kenoedy airport as he was about to board a Pan American Airways flight to Munich.

you stop the U.S. industry, you've ruined the economy of small towns and cut off workers' incomes," said Frederick McAlpin 3d, whose Washington law firm is handling

the companies petition. But a spokesman for the trade commission cautioned: "It's true that, if these American plants fold, it's welfare-town for the people who work there. But we will go into all sides of the issue and determine if other factors are affecting the market situation."

The U.S. firms agree that imported pins pose a threat timports are up 58 percent since 1973) hut that the real threat is from the Communist imports which have risen 113 percent in five years.

The manufacturers are asking

the commission to apply a section of the 1974 Trade Act that deals solely with Communist products. They want a limit on imports or

higher import duties.
The International Trade Commission has scheduled a hearing on the matter for June 22 in Portland.

Russians Beaten At Western Sale

MOSCOW, June 5 (AP) - Two Ukrainian brothers were beaten and bloodied by Soviet police here after they purchased Western record albums at a flea market held by Westerners hut open to the general public, witnesses said.
Witnesses said that the two stu-

dents were thrown face down ioto an unmarked car and driven away. and that police harassed other Rus-sians who had bought goods at the sale and confiscated their purchas-

5-Year Timetable

The program, as called for by Congress, establishes a timetable for the development of hazard-reduction measures through 1983. It calls for the designation within the next eight weeks of a "tead agency" to coordinate efforts by the numerous federal departments contributi-

ing to the effort.
This includes research by the Geological Survey and the National Science Foundation, and construction programs of such depart-ments as the General Service Administration, the Defense Department and the Department of Housing and Urban Development.

Still undecided is whether a new agency should be created to provide the coordination and leadership or whether an existing organ of government can be assigned the responsibility.

The plan would create a Nationalmost all levels of government the al Earthquake Prediction Evaluation Council to deal with the advancing capability in earthquake protection. The council would not issue disaster warnings, but would provide the governor of a seemingly threatened state with an evaluation of the threat. The governor would then decide what to do.

The councit would replace the Earthquake Prediction Council of the Geological Survey that was designed following recommendations a conference on the subject in 1975. This panel was to consist of five in 10 specialists from the Geological Survey and a comparable number from outside of govern-

Bot in the study that formed the basis of the new plan, it was noted that the old council had been inhibited from using outside experts be-cause of a congressional require-ment that there be 15 days' notice before any meeting of such a joint panel, a requirement that would bave prevented quick response to a

It cites "the universal human tendency to assume that everything is all right until events clearly proper Egypt Leftist Party Joins Although low-cost earthquake Protest of Restrictive Law

small leftist party, the Nanonal Progressive Union, today announced that it is suspending political activity to protest a new law restricting political activity.

The decision was announced three days after Egypt's largest op-position party, the New Wald, dis-

banded for the same reasons.

The NPU will decide its fate at a general assembly meeting Sunday.
Unul then, it will suspend political activity and contest the constitutionality of the law in court, a state-

The law, passed by the parlia-ment last Thursday, embodies prin-ciples submitted by President Anwar Sadat to a national referendum and approved by 98.29 per-cent of the voters. Mr. Sadat ordered the vote in light of increasing criticism of the government from the leftist and rightist parties.

The law directly affects the leftist party — a coalition of Nasserists. Socialists and Marxists that claims a following of 100.000 — because it

The party said that the bill threatens freedom of thought and that it violates Article 40 of the Egyptian Constitution, which prohibits discrimination on the basis of sex. religion, origin or language and which considers all citi-zens equal before the law.

eral assembly it would engage in the defense of its members and would suspend its weekly newspa-

Press reports say that about 46 leftists have been detained by police, including a member of parliament, on grounds that they urged a no vote at the polls on May 21. Meanwhile, a lower court up-held the suspension of two issues of Al Ahali. The first issue had called for a no vote at the referendum and the second contained a statement the lawyers' syndicate charging that the referendum was unconsti tutional

An indication of acceptable left-ist comment was given last week, when the paper contained no direct criticism of the government and was allowed to appear on the stands. The paper printed party recommendations to the government on domestic issues.

Sagat ordered the reteren dum after accusing leftist and rightist politicians and journalists of abusing the rights given to them under his 1976 political liberalization program. The opposition had alleged government mishandling of foreign investment projects, questioned the personal integrity of some ministers and blamed the government for rising prices.

German Builds Neutron-Bomb Shelter fin to absorb any neutrins that

Believes War Is Inevitable

By Michael Getler

ERWITTE, West Germany, June 5 (WP) - What is 10 feet wide. 4 feet underground and stocked with

The answer: a German neutron bomb shelter.

Friedel Joebem, n 48-year-old construction engineer, is probably the first person to have what shelter manufacturer Guenther Draude calls a neutronenglocke, a bellshaped underground shelter designed to help groups of six to nine persons survive the effects of the proposed neutron artillery shell.

Mr. Jochem said he is certain that someday the Russians will attack West Germany. "There is such political trouble around the world in recent years and such moral de-cay that war has to come," he said. Mr. Jochem acknowledged that his neighbors in this small town in central West Germany only gawk

in curiosity and amusement at the mammoth hole in his backyard. "But during the time of Noah." he said, referring to the biblical ark builder, "people were joking, too, making fun. People do not see the

reality of the situation."

A handful of West Germans apparently share Mr. Jochem's views and have ordered the underground

Mr. Draude, who operates a

lighting fixture factory in Wuppertal, took over a bankrupi atomic shelter company four years ago. He made no sales until eight months ago. Since then, he said, 14 persons have contracted to have atomic bunkers installed. In the last two months, 4 of those 14 persons have requested the special anti-neutron protection. Several hundred others have expressed interest, he said.

The neutron weapons - developed by the United States but thus far withheld from production by President Carter — are meant to counter Warsaw Pact armies which have a 3-to-1 advantage in tanks in central Europe over NATO forces. These weapons are meant to kill

by intense radiation rather than the blast or heat that accompanies the explosion of existing atomic arms. They are meant to be used against invading tank armies on a West German battlefield without necessanly destroying nearby towns. The weapons are extremely con-

troversial. Mr. Draude said that his customers tend to be very conservative politically. Mr. Draude and Mr. Jochem said that they believe the neutron weapon is the best defense against Soviet tank armies. Both believe that the center-left government in West Germany is too soft on the Russians and is withholding information on the extent of the threat.

Mr. Draude is certain of a Soviet attack and has bought a armned truck from the West German Army in transport his wife and three children to the western side of the Rhine River. He has also designed watchhands that can earry hidden pieces of platinum and buttons that contain gold coins for use as barter in the chaos of the war that he sees as inevitable. The shelters, however, are expen-

sive. The cheapest one costs about \$20,000. Mr. Jochem's more claborate model can hold up to 40 persons and costs about \$65,000. The cost, however, can be amortized as a tax write-off at about 10 percent a year. Mr. Draude said. The Draude system involves the

basic bell-shaped steel enclosure, whose top half is coated on the outside with a live-inch layer of paraf-

penetrate the four feet of earth on top of the structure. A thin fiber glass hemisphere goes over the paraffin. A sprinkler system is also installed underground to saak the

To Fit Ideas to Conditions

Teng Asks Army to Be Flexible on Mao

By Fox Burterfield

HONG KONG, June 5 INYTI -Teng Hsiao-ping. China's twicepurged deputy premier. has called on the Chinese armed forces to be flexible and realistic in their interpretation of the thoughts of the late Mao Tse-lung, updating them to fit contemporary conditions.

Speaking to a national conference on political work in the army, Mr. Teng said that "beyond doubt we must at no time violate the basic principles" of Mao, But, he added, "we must integrate them with reali-ty, analyze and study actual conditions and solve practical

Mr. Teng, who is also a vice ehairman of the Chinese Commu-nist Party and chief of staff of the armed forces, stressed the need to "mechanical copying" of Mao's ideas, "If we just copied past documents word for word, we wouldn't be solving any problem, let alone solving any problem

"In that case," Mr. Teng said, even if we paid lavish lip service to Mao Tse-tung thought, we would actually he running counter to it. Mr. Teng's speech is the latest in

a series of etions by Peking to demythologize and re-evaluate Mao. His successors continue to publicly Political Department, Wei Kuopraise him, for to do otherwise would be to risk unraveling the whole Communist Parry and state. But an attempt is being made to cull those aspects of the late chair-man's thinking that now appear to be antithetical to economic development and China's effort to be-

come a modern industrial power by the year 2000. Hence Mr. Teng, instead of focusing on any of the actual policies Mao had proclaimed, stressed that the essence of his philosophy was his realistic approach to solv-ing problems, "Chairman Mao's halliant concept of seeking truth from facts. Mr. Teng said his analysis of "new historical conditions and identification of new

Senior Hierarchy

problems," was his fundamental

viewpoint und method.

The conference on political work in the army, which met recently in Peking, was also attended by most of the pany's senior hierarchy, in-cluding Hua Kuo-feng, the pany chairman: Yeh Chien-ying, the ranking vice chairman, and top mil-

ehing, who is a close associate of Mr. Teng.

In the summary of Mr. Teng's speech transmitted by the Chinese news agency, there was no reference to the sensitive subject of Mao's doctrine of people's war, his belief that men, rather than weapons, decide wars.

But the implication of Mr. Teng's remarks seemed to be that this idea needed modification to take account of the rapid development of sophisticated weapons. "Judging from the problems and conditions netually existing in the armed forces." Mr. Teng told the delegates, the most important thing is "to enhance the combat strength of our army under new historical

Obituaries

Ex-Sen. Joseph Montoya, Was on Watergate Panel

WASHINGTON, June 5 [UPI] - Former Sen. Joseph Manuel Montoya, 62, a Democrat who worked his way through the political ranks in New Mexico and came to national attention as a member of the Senate Watergate Committee, died today.

Mr. Montoya had been hospitalized at Georgetown University hospital since early May for treatment of gastro-intestinal bleeding. Two operations failed to reverse the condition. He suffered kidney failure on Saturday.

Mr. Montoya launched a fourdecade political career in the Great Depression, winning election to the New Mexico House in 1936 while enrolled in law school at George-

town University in Washington. He served two terms in the New Mexico House, three terms in the state Senate and four terms as lieutenant governor before winning election to Congress in 1957 at the

Defeated Mechem

Mr. Montoya won election to the Senate in 1964, defeating four-time New Mexico Gov. Edwin Mechem, the man appointed to fill a vacancy created by the death in 1962 of Sen. Dennis Chavez.

Mr. Montoya won re-election in 1970, defeating conservative Re-publican Anderson Carter who got

last-minute campaign help from President Richard Nixon. A liberal, Mr. Montoya was no friend of the Nixon administration. He contributed to Senate rejection of two Nixon nominations to the

Supreme Court, Clement Hayns-worth and Harrold Carswell. And he alleged in 1971 that the Justice Department was tapping his telephone, a charge denied by the Nixon administration, Mr. Montoya also charged that the Post Office had opened first-class mail without the knowledge of the recip-

Empain-Case Suspect Is Arrested in Lyons

PARIS, June 5 (AP) - Police said today that they arrested a 29-year-old man suspected of being a member of the gang that kid-napped Baron Edouard-Jean

Robert Matheron, who was arrested Saturday in Lyons, disappeared from his home shortly after a March 24 shootout near Paris when police set up a fake attempt to deliver ransom money. One member of the gang was killed in the police amhush, another was arrested and others escaped. Two days later, Baron Empain was released after nine weeks of captivity.

Mr. Montoya later became a member of the Senate Watergate Committee, the panel that probed Nivon administration activities and laid the groundwork for Mr Nixon's resignation in August,

But it was during the same peri od -at the peak of Mr. Montava's political career - that the steady string of political successes began

He had "laundered" more than \$100,000 in 1970 campaign contributions through "dummy commit-tees," The Wall Street Journal reported. Mr. Montova denied it.

Mr. Montoya, chairman of the Senate Appropriations subcommittee overseeing the Internal Revenue Service, did not have his income-tax return audited for more than 25 years - an unusually long time for

millionaires such as him. In 1976, the Treasury Depart-

Ex-Sen. Joseph Montoya

ment admitted earlier efforts to audit Mr. Montova had been drupped. The IRS conducted an election-year audit of Mr. Montov-

 the first since 1950.
 That November, the bad publiciand the campaign of former astronaut Harrison Schmitt ended Mr. Montoya's political career.

Joan Little's Bid to Stay In N.Y. Rejected by Court

WASHINGTON, June 5 [UPI] - The Supreme Court opened the way today for the immediate return of Joan Little to Nonh Carolina state prison, where she claims she will be subject to abuse and per-

haps be killed, Miss Little, who escaped from a prison in Raleigh, N.C., in October, had asked the justices to allow her to remain in New York City, where she was captured on Dec. 7. until her lawyers could appeal a decision against her by the 2d U.S. Circuit Court of Appeals,

The high coun rejected her request today in a brief order, with-

Her lawyers contend that they

never had an opportunity to dem-onstrate what is likely to happen to Miss Little if she again becomes a prison inmate in North Carolina.

Breaking and Entering

The black woman became a national figure during her 1975 trial on charges of killing a white jailer who, she said, had tried to rupe her. A jury acquilled her of murder,

At that time, she was confined to the Beauford County Jail for hreaking and entering three mobile

Last October she escaped from the Women's Correctional Center at Ruleigh. In the effort to prevent her return to North Carolina, it has been suggested that she escaped because she was harassed, denied adequate medical treatment and refused parole - all because of the

episode at Beauford. She has been quoted by her lawyer, William Kunstler of New York, as saying that she would rather die than return to North Carolina" because she is a "marked woman who has been acquitted of

the murder of a white prison guard." Justice Thurgood Marshall on May 30 temporarily blocked Miss Little's extradition until the entire court could consider the stay appli-

On her return, she would com-plete her original sentence and also

face escape charges.

After rulings against her in New York state courts, she turned to

federal courts for help.
U.S. District Judge Kevin Duffy said he could not find that she would be unconstitutionally confined in North Carolina,

Post Office Workers Still Strike in Israel

JERUSALEM, June 5 (UPI) -Israel's 5,500 postal workers diso-beyed a court order today and stayed away from their johs for the second day. The workers are de-

manding a 40-percent pay increase. The strike halted all mail pickup and delivery, except for suldiers who continued to get mail through a special service arranged by the Ministry of Communications, All post offices were also closed.

partnership with Bayer

+++increased road safety with engineering plastics+ "soft face" vehicles reduce the risk in accidents +++

Bayer says: more cars need not mean more injury and damage in ac-

Economic development is penetrating into the furthest corners of tha earth. New roads improve the infrastructure and promote economic expension. But this growing mobility is taking its toll. Are the increasing personal injury and material damage on the roads inevitable? The sheer volume of todey's road-traffic obliges us to reflect on this problam rather than resign ourselves to it.

Engineering plastics improve vehicle safety

The greetest treffic hazard is men himself. There is little we cen do to change his "design", but we can do something about that of his car. About 50% of roed eccidents occur at speeds between 15 and 30 m.p.h. (25 and 50 km/h).

A great deal of distress cen ba averted if the car's occupants sustain no more then minor injuries in such colliaions, and this is where the design end construction of the vehicle play a decisive role. Bayer polyurethane foams are used as padding in many parts of the interior to lessen the affects of an impact.

Flexible body parts made of engineering plastics increase exterior safety. Elastic bumpers and spoilers withstend e heed-on collision at 5 m.p.h. (8 km/h) without damage. Thus the nuisance caused by minor damage is eliminated. Completely new ; technologies have made it possible to manufacture flexible front end rear end fescias from engineering plastics in a single cycle. This also leeves plenty of scope for the designer.

Beyer is active in almost all countries of the world in the fields of chemicals, dyestuffs, engineering plastics, man-made fibres, phermaceuticala and crop protection. Bayer thinks of tomorrow - today.

Europe, Japan and Oil

getting worried about the U.S.inability - or is it tunwillingness? - to curb oil imports. The best reasons for controlling oil consumption are, of course, to protect this country's own national security and economic stability. But the debate has been almost exclusively in terms of domestic interests. There's another dimension to the issue that generally goes unmentioned in the United States. It's the political effect in Western Europe and Japan of the spectacle of the U.S. government lost in wandering, inconclusive debate over energy.

The Carter energy bill is still hung up in that marathon congressional conference. The most effective section of the hill, the tax on crude oil, is not likely to be enacted at all. This deadlock in Congress has acquired great symbolic significance abroad. There it is taken as an indication of U.S. refusal to deal seriously with a subject of urgent common

The U.S. failure to restrain oil imports has had harsher consequences ahroad, so far. than here. Other industrial countries, more dependent on OPEC's oil than the United States, fear that unrestrained U.S. demand will hasten the crisis that President Carter has predicted and strengthen the forces within OPEC that want sharply higher prices. The large U.S. trade deficits, caused mainly by oil imports, weaken the dollar abroad. The impacts on other countries' domestic economies are severe ranging from bankruptcies in Japan to unemployment in West Germany. If other governments become persuaded that the United States is no longer going to respond to acknowledged economic threats like excessive oil imports, they are going to try to protect themselves in ways damaging to everyone. That means protec-

The U.S. allies in Europe and Japan are tionism. The French are already talking getting worried about the U.S. inability — or about "organized free trade."

Next month President Carter will meet in Bonn with his counterparts from six other big industrial countries to attempt to draft a joint economic program. The United States wants its partners to do a number of things that they say will be difficult and painful. They, in turn, want the United States to do two things to show that it takes inflation seriously, and to demonstrate that it is not going to let its oil imports keep floating upward without limit. The Carter administration's present attention to inflation is probably as much as anyone expects it to be able to do for the present on that score. But on oil imports, it is going to have to come up with much more specific action if it is to be persuasive. Otherwise, Mr. Carter takes a severe risk that the whole summit conference will evaporate in generalities and evasions. The other governments are now fixed on the U.S. performance on oil import curbs as a test of intentions. If the United States does not meet that test, other governments are not likely to respond with much enthusiasm to the requests being made of them.

What kind of curbs? Quotas on oil imports are not an inviting idea. The only other possibility would be import fees imposed by presidential order. The administration is profoundly reluctant to resort to import fees, for it still lopes to persuade Congress to pass the crude oil tax this year. But that hope becomes thinner by the week. Certainly this country has stronger reasons to act rapidly on imports than merely to rescue an international meeting. But if the Bonn meeting in July is a washout, the fragmentation of purpose among the rich countries is only likely to increase.

THE WASHINGTON POST.

The Ghosts of Vietnam

When thoughtful men like Henry Kissinger and Daniel Patrick Moynihan ruminate out loud about the nation's "failure of oerve" and then ascribe the cowardice to "leadership elites" we all had better take notice of the drift of our politics. The talk about world affairs is becoming muscular again and such psychoanalytical counsel can be dismayingly provocative to a depressed White House.

"What has become of our country when we explain foreign policy by the myth of the invincible Cubans?" asks Mr. Kissinger.

"I don't believe we are wringing our hands," replies an already defensively patient Zbigniew Brzezinski. "I think we ware trying to respond to rea

"When we left Vietnam . . . ", Mr. Kissinger suggests, "an attitude developed that we must not conduct any policy — other than rhetoric — anywhere in the world that might possibly succeed . . . that if America is not to be punished for its presumption [in Vietnam], then at least we must be sure that the country is never presumptuous enough to undertake any more distant enterprises."

"In my opinion," says Jimmy Carter. "if President Johnson, President Nixon, President Eisenhower. Kennedy were in office now, having experienced the Vietoam war, they would be very cautious and very careful. not to become involved again militarily. And I have that deep feeling myself." Now wheo a president begins to invoke the protection of his predecessors, you can be sure he's been stung. But here ends our probing of the inner mind. Those who would rouse the nation to take forceful action and to mouot distant enterprises ought to be made to write their prescriptions in words that the rest of us can understand.

The Kissinger-Moynihan conversation, in the journal Public Opinion, moves from the clinical to the opaque. The New York senator finds the nation negotiating with the Soviet Union from a position of military as well as psychological weakness and suggests that no decent arms cootrol agreement will be possible unless the Uoited States threatens to

double and quadruple its defense budget to speod the Russians into bankruptcy. The former secretary of state says it is absurd to think of the Russians as stronger in overall assets; the defeatism is merely confusioo the lack of geopolitical theory that defines "what it is that you cannot permit and what it is you are to try for." He would not have permitted Cubans into Ethiopia.

One man says it is better to threaten everything, no matter what the chances are in making good on the threat. The other says never mind the particular stakes or possibilities, in geopolitics everything is tied to everything else; when an adversary does anything that Americans don't like or uses means that they disapprove then they must stop it.

There, we submit, walks the ghost of Vietnam. It, 100, was once defined as an arena of aggression by a united Communist world; then as the foremost expression of Chinese expansionism. Whatever the stakes oo the ground, or the possibilities, for geopolitical reasons Hanoi had to be stopped. And there could be no pause to assess the costs of that distant enterprise: by doubling and quadrupling the investment in money or lives, Americans would prevail. To resurrect that logic against a Presideot who seeks new techniques for applying U.S. influence around the world is a dangerous game iodeed.

We believe, with Mr. Carter, that the Soviet and Cuban intrusions into Africa are adding to the violence of that continent's struggle to overcome the legacies of colonialism and racism. They are also complicating East-West relations at a delicate moment io arms control oegotiations. Portraying the risks and costs to Moscow is the proper first response. Guiding Africans to a measured response is also appropriate. Anticipating even more bitter strife in Rhodesia is certainly necessary. And a far-sighted appreciation of the combination of benign neglects and interventions that will bring the most credit to the United States is necessary. Blaming the Cubans, or cowardice, for our difficulties is internationally petty and domestically provocative.

THE NEW YORK TIMES.

International Opinion

U.S. Action in Zaire

Efficiently and without preliminary and public agonizing by the White House. United States air transports are ferrying Moroccan soldiers into the Shaha province of Zaire.

in collaborating with the French to mount this airlift. President Carter is also semaphoring to the other memers of the Western alliance his helief that NATO should be prepared to hammer out a more active and coordinated response to Soviet imperialist subversion in Africa

The provision of a few planes for troop transport may not appear much, but provided as they are by a great power, still bruised and humiliated after defeat in Vietnam, they represent a welcome reassertion of U.S. presidential will on the world scene.

KANSAS CITY, Kan. - Additional triumphs by Herbert Hoover in the Republican National Committee today brought the total of votes clinched by the commerce secretary within the last 48 hours to 24. As each vote of the committee today brought a new Hoover success, it became clear to observers here that the only person who can keep the GOP presidential nomination from Mr. Hoover is President Calvin Coolidge

Jerry Brown Shifting Gears

By Rowland Evans and Robert Novak

SAN DIEGO — When Gov. Ed-mund G. Brown jr. appeared at a fund-raiser here one week before California voters were about to vote on the buge property tax re-duction today, he demonstrated an extraordinary political agility which may yet propel him into the White House.

Brown is an avowed opponent of the constitutional amendment (sponsored by anti-tax crusader Howard Jarvis) cutting \$7 billion in property taxes, and so were most of those present at the posh Kona Kai Club who had spent \$125 a plate. Nevertheless there was no call to defeat Jarvis. Rather, Brown quietly called it "the latest manifestation of a very serious unease about government" and hoped his response to it could produce a "re-

newed charter" for government. That climaxed a week of hasty adjustment by Brown once it became clear the jarvis a would pass, Not only did he switch from all-out opposition to detached ambiguity but resumed the antigovernment rhetoric of his early. intensely popular days as governor.

New Approach

This shift may well fulfill what Brown and his political strategists have been seeking: a new approach bringing the governor and his poll ratings out of the doldrums. Ironically, the Jarvis amendment could prove Jerry Brown's salvation, both for reelection this year and his ambitions to replace Jimmy Caner in

Those ambitions receotly bad been eclipsed by worries about winning a second term. His closest advisers admitted that the magic of 1975, wheo Brown entranced a broad spectrum opposing big gov-erumeot and high taxes, had disappeared. Having gradually become the proponent of government programs, he has been sounding more like Nelson Rockefeller than Jerry

against business and for social

Brown's political tonch was particularly shaky oo Jarvis. By insisting on tax relief which redistributed
income to the poor, he must share
with the state legislature blame for
the people. It [the tax-cut proposal] inaction that generated irresistible essure for Jarvis. One of Brown's key advisers conceded to us that, in underestimating chances for Jarvis, "Jerry missed just how much public contempt there is for the political class."

Blunder

Campaigning vigorously against the Jarvis amendment this spring. Brown committed a rare, unmitti-gated political blunder. He sup-ported a freeze on higher new property assessments just before the Jarvis vote, a transparent gimmick termed "kindergarien Watergate" by the hot-tempered Jarvis. Facing a personal defeat and the headache of confronting the \$7-billion revenue loss, Brown seemed headed for disaster.

Two weeks before the election Brown abruptly shifted gears. His border-to-horder (Mexico-to-Oregon) campaign swing against Jurvis was canceled. Instead, he announced conferences with financial experts to determine strategy following what he now conceded would be the pasage of Jarvis.
On a tour of black churches in

Los Angeles on May 28. Mayor Tom Bradley harangued audiences to vote against Jarvis. But not Brown. He hardly mentioned the issue in the first two churches visited, then in the third church undercut the anti-Jarvis claim that its passage would halt vital govern-ment services.

"All these things will be done." said Brown, "by the people themselves if not by the government" a return to his discarded 1976 call for "voluntarism" replacing government. Later that Sunday, addressing a cheering Armenian inde-pendence rally of some 7,000, be id not one word about the coming vote.

Brown now talks about "the voice of the people being heard" and promises. "We're going to cut government at all levels." He claims be is best equipped to "cut and squeeze," pledging, "I will add renewed political strength to the 20verrunent.

cent) multiplied by 12 months to arrive at an annual rate ceiling

(such as 18 percent).

A rate ceiling should be high enough so that all who need credit, including high risk borrowers, will be able to obtain legal loans, but

low enough so that a lender may

oot take undue advantage of bor-rowers who have little or no bar-

gaining power. Ideally competition

charged well below the ceiliog.

A potential borrower in the

is severely flawed, but we will do

That is Brown's theme for the fall campaign and perhaps beyond. Is it remotely possible that Brown would carry to the nation the Jarvis-forced banner of tax reduction and reduced government? "If we respond to this problem effec-tively," he replied without even the hint of a smile, "the rest of the country would be extremely interested."

The African Crux Of Carter Policy

By Tom Wicker

WASHINGTON — On May 17, morning newspapers reported a major military operation by Ethiopia against Eritrean rebels, leaving unanswered the question whether Cuban troops were aiding their Ethiopian hosts. The Katan-gan invasion of Shaba Province in Zaire had been underway then for three days, amid unsubstantiated reports of Cuban and Soviet help for invaders.

When congressional leaders gathered at the White House for their weekly breakfast with President Senate minority leader Cariet. Carter. Senate minority leader Howard Baker raised the subject of Africa. When, he demanded to know, was Carter going to take some action to stop the Cubans? According to some who were present, Baker "really leaned on" the President about his failure to respond to a Soviet-Cuban challenge. Carter eventually told Baker that

the responsibility was not his alone; congressional restrictions on presidential powers limited his ability to act, he said. This complaint was later offered publicly but Carrer nevertheless was able to order the United States to take part in a rescue lift from Shaba. And ever since that breakfast meeting, his administration has been working up a remarkable show of resent-ment toward the Cuhan-Soviet "challenge" in Africa.

The possibility seems strong, therefore, that Carter's apparent determination to "respond" derives less from the actual dangers of Cuban or Soviet dominance of Africa, or even of specific African nations, than it does from two more traditional concerns of 115 possidents. tional concerns of U.S. presidents - that the Soviet Union, the other superpower, will come to see him as a weakling who can be imposed upon anywhere in the world; and that U.S. voters will react angrily to what they see as the Communists pushing us around" in Africa.

These concerns are valid. Soviet power undoubtedly does seek to fill the vacuums it perceives, and Carter learned in the Panama Canal debate the depth of Americans' resentment of any supposed U.S. "retreat." But when exaggerated, these presidential concerns produced and sustained the war in Victnam - a fact that ought neither to dominate nor be discounted

in African policy considerations, Now, however, U.S. military in-volvement is less the danger than the possibility that Carter's show of strength may undercut the promising new approach to African affairs that marked his first year in office. Now he is emphasizing the global or geopolitical aspect of events in Africa, and reacting to U.S. public opinion; but he may also be sacrificing black, nationalist African confidence in American purposes.
"As I speak today," Carter told

the recent NATO meeting in Washington, in what estensibly was a mitionale for an international response, "the activities of the Soriet Union and Cuba in Africa are. preventing individual nations from determining their own course." In fact, it has not yet been shown that Cuba is belong Ethiopia suppress
the Eritrenn secessionists; in Angota, Cuban personnel — many of
them nonmilitary — are present at the specific request of the Neto government; and only in Zaire, where the Carter administration says it has evidence that Cuba and the Soviet Union helped stage the Shaba invasion, can it be argued that the Cubans may be "prevent ine individual nations from detenpe ti

Yet, although Carter has personally denied that he has decided to "freeze" the SALT talks to show his displeasure at events in Africa, that possibility obviously has been involved to Moscows Much administrated to Moscows Much administration of the Moscows Much admin signaled to Moscow. Much admin-istration speechmaking is now to be followed by discussions in Paris with NATO allies concerning some: kind of international response. Reports from there suggest than U.S. arms for this effort will be supplied at second hand by Sandi

mining their own course."

Arabia and Iran.

But the "international response," if any, will be undertaken in concert with France, Belgium, West Germany and Britain - all the old white colonial powers in Africa Prime Minister John Vorster of South Africa already has hailed this "change of opinion in the West about the Marxist onslaught against Africa" — and with friends like that, who needs enemies in black Africa?

Vorster's embrace raises the right question: does it really make sense for the white Western powers to equip a "pan-African force" with U.S. weapons, ostensibly to fight Cubans who carefully present themselves as supporters of revolutionary black nationalism? This is bound to appear in Africa as an U.S. reversion to the idea — assidaously propagated by Vorster—that Africa is essentially an East-West hattleground for the superpowers and their surrogates, rather than a collection of nations with their own rights and their own concerns, chief among them the ulti-mate black-white struggle for power in southern Africa.

There, in Rhodesia and South Africa and Namibia, is the real: crux of the matter, and that is where the focus of U.S. policy [fill] (*) should be too, Carter's frustration. at Soviet-Cuhan audacity may be understandable but he will repair it at a high price indeed if he appears in the name of anti-Communism to align the United States again with the forces of reaction, racism and exploitation.

The Vance-Brzezinski Contest

By Stephen Rosenfeld

WASHINGTON — There is a W sbarpening sense in Washington of a contest between Zbigniew Brzezinski and Cyrus Vance for the mind of Jimmy Carter that is to say, for power, It could get messy. It needn't. If the Presi-dent puts their different strengths into focus, it offers him the opportunity to shape a more effective foreign policy.

The tussling is Jimmy Carter's fault. Had he conveyed to his lieutenants over the last 17 months a clearer idea of what kind of policy he wanted they would surely have taken up their positions in the indicated line of march. Even today. however, no one — perhaps not even the man himself — can say whether Carter is basically a "liber or a "conservative" in respect to the Soviet Union, whether he gives priority to standing up to the Russians or coming to an accommodation with them or splitting the dif-ference. He jumps around like a

water spider on a June afternoon. Brzezinski, I gather, long fretted about this permissive and unstruc-tured condition. An academic accustomed to rounding out concepts on paper, he perceived Carter's inconstancy as a void and proposed to fill it with what comes down to a theory of Soviet expansionism. In the last few years the Kremlin's arms programs (strategic and con-

they were. Theo Rosenberg wrote

his book and Time magazine put Steinberg on the eover, and all this seemed to reflect that the drafts-

man was losing his grip, that his

ventional) and African interven-tions have made the theory increasingly plausible, and have protected people who hold it against damag-ing charges of "cold warnor" charges Brzezinski is drawing now from the Russians and segments of the U.S. left. The Russians made him what he is today.

Looseness

Vance, I surmise, could have lived with Carter's looseness. A lawyer trained to balance out differences quietly, he perceived the Carter approach as an opportunity to pursue his own preference for issue-by-issue diplomacy. No historian, no intellectual, Vance has no theory to explain aspects of Soviet policy that bother people, and no evident awareness that in uncertain times people want explanations of their unease.
Vance bas a view of the Soviet

Union arising from his interest as a negotiator to ensure that there is a partner across the table "I believe it is essential we try to find a common ground [with the Russians]. I believe as long as we maintain the necessary military might and strength at home we shouldn't be fearful of everything they do and automatically accept the thesis of the worst-case motivations. One has to be more pragmatic about it." Vance told Time magazine recent-ly, noting in the same breath that "a different perspective with re-spect to the Soviet Union is the big-gest set of differences" he has with Brzezinski.

Well, one man's pragmatism is another man's heartburn. One can accept and value all of what Vance says without feeling he has closed with the issue. What is the "necessary" military might? If not of "everything," of what should we be fearful? How pragmatic? Substantively and politically, Vance goes wrong, I think, in not addressing those aspects of Soviet policy that those aspects of Soviet policy that

complicate the quest for "common ground," So long as he conveys the impression that the anxieties heldmany of his fellow citizens iren't all that serious, he will not have the scope he wants to pursue diplomatic solutions.

I don't wish to suggest Carter is devaluing Vance; I bave no special information, anyway. On the contrary. Vance's good sense in sizing up particular situations seems to have been recognized. Regarding Zaire, for instance, Brzezinski, with the engaged imagination that is the mark of the intellectual newly come. to crisis management, made some action proposals that were pretty far out. Carter went with Vance's more modest proposals, which worked well enough.

Harness Talents

For Carter, though, the problem is not to bury his advisers' diver-gent approaches with amiable tolerance but to harness their separate talents to the making of wise poli-cy. It will be his responsibility, and the country's loss, if the tension between them degenerates into mere bureaueratic rivalry, or gives unduc bargaining advantage to Moscow.

The Brzezinski emphasis on secing things in the round is, I think basic. Vaoce must fearn to convey an understanding of how things fit together — SALT and Africa, for instance. This doesn't necessarily mean linkage. It means accepting relationships that are there. With out that the administration will have neither sound policy nor politlcal support.

Only then can there be a good argument on how to pursue partiallar diplomate or military initiatives. They must be set in the large context. To me the risk at the context of the context moment is that, in the absence the larger view, the arguments the initiatives will be skew Carter should take charge.

WINE

Trying to Do Justice To Variety of Whites

By Jon Wintoth

is supposed to be more in gastronomically than ordering red wine with oysters. Then you further startle the uninitiated by plopping the red — eveo if it is Bordeaux ioto an ice bucket,

This sort of thing is all right for a change of pace or if the restaurant in question doesn't have a decent white on its list. But it applies only to light, fruity reds that actually have more in common with white wines than with most other reds.

White wine is more than just an excuse for drinking a Kir (white wine with a finger of liqueur de cassis). Even io the United States, where whites are booming as aperitifs, they are largely restricted to seafood and white meats at table. That is limiting and hardly does

whites, which includes at least two of the greatest wines of France: Burgundy's grand cru Montrachet and Bordeaux's grand premier cru Chateau d'Youem, classed above even the Medocs premiers crus in 1855.

But first, what is white wine? It is almost always a wine made from white grapes, hut there are some outstanding exceptions. Most champagne comes from black grapes, as does Alsatian Gewurz-traminer. This is possible because only the skins of most black grapes contain coloring matter. The pulp

Whatever the color of the grapes, they are crushed and pressed rapid-ly to avoid oxidation, which turns the wine yellow and gives it the flat taste of old wine.

Fermentation may take place in barrels or vats but it is kept at as low a temperature as possible, be-tween 15 and 20 degrees centi-grade, Below 15 degrees the fermentation is likely to stop and above 21 degrees to destroy the fruitiness of the wine.

Some whites are bottled straight out of the vais and others are aged first in oak barrels, as with Burguo-dies, Graves and Sauternes. Barrel aging imparts tannin that the fermentatioo of juice without skins and stems does oot provide, and seems to give a longer life to such wines. Ten years is the limit for most dry whites but 25 is oot unusual in very good years and even a century or more is possible in rare

Exposed to Air

The extraordinary vins jaunes (yellow wines) of the Jura, deliberately exposed to the air during six years of barrel aging, will keep as well or better than most reds. The Nicolas wine firm has some per-fectly preserved 1834 Arbois jaune in its collection of old wines.

The same lasting power is true for the Jura's vin de paille and Sauthe psychology and education, of-ten lack the ability to confroot the world instilled in blind men." ternes, both sweet wines. The first is made from bunches picked ripe and dried, formerly oo straw mats (hence the name), before pressing. The second is dried on the vine by pourriture noble (ooble rot), a fungus, Botrytis cinerea, that reduces water and acidity in the grapes and thereby coocentrates the sugar content.

Io both cases, there is more sugar than the enzymes in the yeasts can transform into alcohol and the wine remains sweet. When the wine attains obout 15 percent alcohol, the alcohol itself inhibits further production of alcohol.

In such wines, the danger of refermentation remains and to avoid it, the wine is given a dose of sulfur dioxide (SO2). Kept within reason, under 100 milligrams per liter, this bactericide is generally unnoticeable.

When it goes too high (the au-

DARIS, June 5 (IHT) - Nothing thorized maximum is 450 milligrams and highly ooticeable), it leaves a bitter taste in the mouth, a burning sensation as it goes down the throat and hits the stomach and a nasty headache the next morning. This is called a bar au front io French because you feel it across the forebead and just above the

Just as Digestible

Excess \$02 is no doubt the main reason so many people are turned off by whites, which they claim they can't digest. But reds also coo-tain SO2 and few people complain even when it is all but overwhelming. A clean, well-made while wine just as digestible as the best of reds, as anyone from an exclusively white wine-producing area can

Cooling is another problem of white wioes, Ideal temperatures for different types of wine vary, but io most regions the growers drink them at cellar temperature — anywhere between 10 to 14 degrees centigrade. Ideally, dry whites should be at about 10 degrees. sweet whites and champagnes at 7 to 8 degrees.

And now hack to what can be done with white wine other than usiog it as an aperitif or to accompa-oy fish and white meats. Why dry hite as an aperitif? A cold glass of Sauternes or sweet white Anjou (Coteaux du Layon, Bonnezeaux, Quarts de Chaume) makes a perfect

These wines also go marvelously well with foie gras, fish in cream sauce, Roquefort cheese, fruits and many desserts that are not overly sweet. Very dry whites such as Sancerre go with shellfish, fish. ham sausage and other charcuterie, snails and goat's cheese.

More full-bodied whites, such as Graves and Burgundies, go with fish in sauce, veal, pork, chicken, rabbit, milk-fed lamb and kid. frog's legs and even certain types of game—quail and pheasant, for

White wine also goes with Chaource and Coulommiers cheese (champagne), Comte and other gruyere-type cheeses (any whites but especially those from the Jura). These suggestions are only a

starting point, but whatever the dish, a good white wine is a better

Chastity Belt Sold for \$5.600

NEW YORK, Juoe 5 (UPI) -For \$5,600, an anooymous Texas bidder has bought a 17th-century iron chastity belt.

The auction bouse of Sotheby Parke Bernet, which sold the belt at auction last week, said that the winning bid was believed to be the highest ever made for such a device.

Carved into the iroo belt is a picture of a fox running through the legs of a oaked woman. Scrollwork written in 17th-century German bears a legeod that auctiooeers translated as: "A fox is beld in me and through his bad temper I am always protected while you are

France's Blind Turn Away From Traditional Craft

By Vivian Lewis

DARIS (IHT)-Until a decade ago, piano tuning in France was the business of the blind. Now the near-monopoly the blind have held since the 1830s is ending—not because people do oot want blind timers, but because qualified blind students do not want to work with

() III(The older generation is different.
"I love my metier," says Jacques
Pailleux, 46, a blind Paris-based piano tuner. "I can profit from my blindness to lead an interesting is the success to lead an interesting the last the success the suc lien Clerc, Charles Aznavour, (Mr. Pailleux, who is willing to work long hours, increasingly specializes in tuning for professionals.)

Piano tuning is the royal road blind, says Jean Allanet, principal of the Institut National des Jeunes Avengles, a high school for blind children which, until 1969, was the

Some Doctors Reject Italy Abortion Law

ROME, June 5 (AP) — Italian doctors today began filing declarations as conscientious objectors to abortion just before a liberalized abortion law was to take effect. About 50 doctors filed statements with the provincial health agency in Milan, and hospitals in Rome and other cities reported that many doctors would refuse to per-form abortions. The law, allowing abortion on demand during the first 90 days of pregnancy, received final approval from Parliament May 18 and goes nn the books at midnight tonight.

francs (the same for grands or uprights) for a job which rarely takes more than an hour. Getting to the job takes some time and money, but it is clearly a good liv-ing. Mr. Pailleux, for example, works mostly in recording studios. where he goes by metro or bus, but when going to a place he doesn't know, his wife must drive him. But there is oothing handicapped about his life style, which includes foreign business trips.

Growth Industry

Yet, despite tuners' high earnings, France has an annual deficit of 15 or 16 piano-tuning graduates or 15 of 16 plane-timing graduates a year. Thanks to zooming plano sales (15,000 in 1976, 17,000 last year, almost all imports) tuning is a growth industry. The French government, in 1969, broke the cearmonopoly of the blind by opening a plano technicians' program at Le Mans. Following a five-year course and three-year apprecticeship, the and three-year apprenticeship, the first Le Mans products are presently seeking jobs. "The program is too new for us to have experience of it, but it sounds like a good says a leading Paris piano

The first students at the Institut National des Jeunes Aveugles, founded in 1784, were trained as organists. It was thanks to the phisophes, above all Diderot's friend Valentin Hauy, that educating the blind was first attempted. But antidericalism after the French Revolution led to a shortage of openings for organists. The early 19th century saw the rise of the piano as a salon status symbol. Jean Montal persuaded the poet Lamartine to sponsor legislation (subsequently renewed by the Second Republic)

granting a tuning monopoly to the Hauy's demonstration that the blind could be taught and could earn their living resulted in schools similar to the institute being set up in various German provinces and the Soviet Union. In many Europe-an countries, blind children were trained as tuners, too. A system similar to that of France exists in Poland, the Netherlands, England and Austria, among other countries. (In the United States, blind individuals sometimes eam their living as tuners, but there is no sys-

eign banks doing business in this country must maintain with the nation's central bank, the State Bank of Pakistan.

Foreign banks or their branches operating in Pakistan now will have to maintain at least \$500,000 in the form of cash deposits or unemcumbered approved securities, or 7.5 percent of their time and demand liabilities, whichever is larger compared with the previous minimum of \$200,000 or 5 percent.

The government said the new amount is realistic in terms of the large business operations of the for-eign banks in Pakistan, and also will bring more foreign exchange

into the country, In Karachi, Pakistan officials said Canada will give Pakistan more than \$60 million to help develop its oil inoustry.

Yamani Sees Steady Prices On Oil in '78

RIYADH, June 5 (AP-DJ) -Oil prices will remain frozen for the rest of 1978 hut after December, price lucreases are in the best interest of the West, Saudi Petroleum Minister Shiek

Ahmed Zaki Yamani says. Mr. Yamani, who will join other oil ministers from the Or ing Countries in Geneva June ganization of Petroleum Exportfor the regular mid-year OPEC meeting, said yesterday that Saudi Arabia will, as it did last December, oppose calls by Algeria, Libya, Iraq and other OPEC members for a price increase this year. crease this year.

Acknowledging his country's dominant role in OPEC, Mr. Yanuni said; "I can say the freeze won't be lifted." Oil prices have been frozen since last July. But he did not make any such promise for 1979 and beyond. In an interview, he said gradual price increases over the next several years are necessary to protect the industrial West from a sudden, sharp jump in oil prices in the mid-1980s, when the current oil surplus is exected to become a shortage.

Gold Declines by \$2

LONDON, June 5 (Reuters) -Gold closed more than \$2 weaker at \$182.75-183.25 an ounce, down from the previous finish of \$184.80-185.20 hut little changed from today's afternoon fix of \$183.05. dealers said today. Turnover was

ngness to defend the dollar by using their own reserves, including gold, monetary and fiscal policy actions, and giving the fight against inflation a higher priority.

• The return of confidence has

allowed other factors to be felt in a postive way, he said, such as the unwinding of abnormal "leads and lags" in import and export payments, and the large interest rate differential between Deutschemark assets and dollar assets.

But, he said, there can be no doubt that in the longer run much depends on a solution in funda-mental problems, such as the nil and inflation problems of the United States. He stressed these funda-mental problems include a narrowing in the growth gap between the United States and its major trading partners.

"Inflation is the dark spot in this pieture," he said. "It remains to be seen how soon the inflation differential vis-a-vis the countries with 'strong' currencies will be reduced, and whether it will always be suffi-ciently offset by the difference in

Monetary Stability

Mr. Emminger also said that measures leading to more monetary measures leading to more monetary stability in Europe, specifically a widening of the European unit of account (EUA), would be "highly desirable. Wider use of the EUA, which might even lead to a European parallel currency, is an interest-ing idea which should be examined thoroughly," be told the annual meeting of Association Cambiste Internationale, a world-wide group of foreign exchange dealers. He dismissed, however, the pos-

sibility of an international monetary system of fixed rates or a fixed target zone vis-a-vis the dollar.
This is ruled out by the very size and volatility of liquid dollar funds in the world, and also by the very clear attitude of the American au-

thorities on this point," he said,
But, Mr. Emminger said, a wider
zone of currency stability in Europe is an idea that was given "a
big boost" by the recent EEC summit conference in Copenhagen, Al-though he added that "the jury is not yet out on this idea, so I will refrain from going into details."

Mr. Emminger did, however, warn the dealers about pitfalls in

widening European monetary sta-By imposing exchange-rate sta-bility before the underlying condi-tions are ripe, countries invite the risk of later balance-of-payments

tensions and exchange crises inside Europe, he said. Larger mutual credit lines may be automatic. They should be used as an incentive to foster adjustment of the underlying disequilibrium. He said, "one should not suffer from the illusion that one could, by large credit facilities, permanently plaster over fundamental dispari-

tics in price trade and growth

A plan for closer monetary integration and exchange stability should not involve an unduly large expansion of national and international liquidity, Mr. Emminger said. He said ideas about bow to expand European monetary stability are more of medium-term interest than a matter of immediate importance, but he said, "a journey of a hundred miles must also begin with a few first steps."

Capital Account Problem

As for the United States, its capital account problem requires "bridging measures," such as using reserves and credit facilities to re-duce and better finance the deficit,

Although in the longer run the

key to a sound dollar is a reduction

of the abnormally large current-ac-count deficit, What is overlooked is that "the U.S. also has a capital ac-count problem," Mr. Emminger said. He said that a significant reduction of the current-account deficit would take time, but in the meantime, "the remaining deficits will have to be financed in en orderly manner." He said this requires a reversal of the U.S. capital balance from the previous net capital exports to net capital imports.

He said the total u.S payments deficit of more than \$30 billion in 1977 was financed by foreign cen-tral banks, which accumulated record amounts of dollar reserves. However, it cannut be assumed

continue "in such extreme magni-tude" in 1978, he said. On intervention in foreign-ex-change trading, Mr. Emminger said that for the last three years, EEC central banks bave used a percentage-change scale to aid in determining disorderly markets for begin-

Seeking Currency Stability

EEC Seen Adopting Monetary Accord

BRUSSELS, June 5 (AP-DJ) — West European countries are likely to adopt next month significant new monetary arrangements aimed at currency stability, experts here forecast.

The financial officers of the European Economic Community already are laying the groundwork for monetary arrangements that will be presented to the heads of EEC governments when they meet in July in advance of the economic summit in Bonn that month.

"I'd say the odds are hetter than 50 percent that new arrangements will be adopted," forecasts one diplomat. Observers will get an early indication of progress when EEC finance ministers meet June 19 Luxembourg to seek agreement un technical

An informal group representing West German Chancellor Helmut Schmidt, French President Valery Giscard d'Estaing and British Prime Minis-ter James Callaghan has also been at work in a broad political strategy for currency stability. Most monetary experts in Brussels say the key is held by Mr. Schmidt because of West Germany's political and economic dominance of Common Market

Determination Unknown

Mr. Schmidt set off the current moves toward a European monetary union at a meeting of govern-ment leaders in Copenhagen this spring, but how determined he is to proceed still remains somewhat

predict that France will formally link its currency to the Deutsche mark.

Weak economies and high rates of inflation make the currency stabilization efforts less attraclive for Britain and Italy. But Exchequer Denis Healey recently suggested that Britain might be

adopts greater growth measures.

"I haven't any doubt there'll be a currency agreement at Bremen (the next EEC government leaders meeting scheduled for July 6), but the issues is how far reaching it will be," says one mone-

willing to go along, particularly if West Germany

tary expert.
The Schmidt-Giscard-Callaghan committee is mapping the broad political approach that anticipates technical issues being resolved by finance ministers in June and a Bremen agreement in July. A number of possibilities have been developed. ranging from a return of the French franc, the Lira and the pound to the current European currency arrangement, the "snake," including a major en-largement of EEC support arrangements, to a modest attempt to set flexible targets for the rela-tion of the French franc, lira and pound in the snake currencies.

Another element is a broadened reliance of the European unit of account, the monetary unit based an a basket of EEC currencies currently used mainly as an accounting device for central bank and other community financial transactions.

None of the currency plans under consideration approach full economic and monetary union, which had been boldly talked of in the past. But the slim progress has persuaded European leaders to avoid excessive rhetoric and expectations this

of a mystery. Giscard d'Estaing, fresh from a strong political showing in the March elections, is viewed as a firm advocate of currency stability. Monetary experts

FINANCIAL NEWS AND NOTES

No Oil Found in New Jersey Well

The first exploratory well drilled in the Atlantic Ocean off New Jersey is being plugged and abandoned as a dry hole. Although some industry officials concede they are disappointed by the development, anounced by Continental Oil, they caution there is still a long way to go in the risky and expensive search for oil off the U.S.'s East Coast, Meanwhile it was learned that the Interior Department while, it was learned that the Interior Department has revised its estimates of reserves in the Baltimore Canyon area, tracts of which were offered at a lease auction in August 1976. The department now calculates the area contains 800 million barrels of oil and 13.3 trillion cubic feet of natural gas. This compares with pre-auction estimates of 400 million to 1.4 billion barrels of oil and 2.6 trillion to 9.4 trillion cubic feet of gas. Conoco, which began drilling April 10 at a site 77 miles east of Atlantic City, says it reached a planned depth of 12,000 feet and found "no significant shows of oil or natural gas." Four other companies are operating oil drilling ries off New Jersey — Exxon, Houston Oil & Minerals, Shell Oil and Texaco. Mohil and Gulf Oil are expected to begin drilling

Detroit Price Rises Growing

Price rises on U.S.-made autos since the start of the year now number 14 as a result of Chrysler

Corp.'s boost of \$95 a car, or 2.4 percent, on two of its better selling models announced late last week. And, in view of the industry's publicly stating new policy of raising prices whenever it sees costs rising, more increases are likely — if nothing else, when Detroit's 1979 models go into production in a couple of months, tronically, the growing string of increases — half of which have come in just over a month — is being billed both in Detroit and Washington as an inflation-fighting tactic.

Saudi University Contract Near

Saudi Arahia is close to commissioning what Industry sources say will be the largest lump-sum construction contract ever awarded anywhere - a \$3.4billion order to build the University of Riyadh's new campus on the outskirts of the Saudi capital, An U.S.-French construction team made up of Blount Inc. of Montgomery, Ala., and the Paris-hased Bouygues, a general contracting company, was told by the Saudis last week that they were the lowest hidders on the project after hids from four international construints were covered publish in Rivadh tional consortiums were opened publicly in Riyadh. In dollar volume, the bid price is twice as much as anything we have ever seen in the construction industry," said Arthur Fox, editor in chief of Engineering News Record, an authoritative industry pub-

Wall St. Prices Soar; Dow Index Up 16.29

NEW YORK, June 5 (Reuters) -Cash heavy institutions returned to Wall Street in force today to push prices sharply and broadly higher in active trading on the New York Stock Exchange,

One analysts said portfolio managers who had been waiting for a market pullback after the strong April-May advance apparently de-cided that "if it hasn't given ground so foar, it's not going to." He add-ed that belund their commitment was a feeling that news about inflation and interest rates "is not going

to get any worse."
The Dow Jones industrial average jumped 16,29 points to finish at 863,83. Its highest level since Sept.

Advancing issues led declines 1,135-to-396.

Volume surged to 39.58 million shares from 31.86 million Friday. Institutional activity was evident in the gains by many blue chip and glamour issues, International Business Machines jumped six to 265°s. Du Pont rose 3°s to 199°s. General Motors, which reported a 15-per-cent rise in late-May car sales, gained 1% to 62% and American Telephone and Telegraph rose is

KLM Royal Dutch Airlines jumped five to 8312. Smithkline rose 212 to 7612, active Squith rose 114 to 32%. Xerox, second most active, gained 116 to 54% and volume leaders Eastern Air Lines rose one to 11%.

Grumman, which received a \$272-million U.S. Navy contract for F-14 fighters added 1% to 2014 in heavy trading.

Pet Up Sharply

Pet Inc. was a standout performer in active trading, soaring 912 to 5214. IC Industries offered to acquire it for \$54 a share if Pet would-drop plans to acquire Hardee's Fixed System. Hardee's fell 112 to 151 at 112 to 151. 174 while IC gained in to 251s.

Continental Oil cased 4 to 281; after announcing it was ahandon-ing its first well in the Baltimore Canyon, Gulf Oil was unchanged at 23% and Cities Service rose ¼ to 52%. They are partners with Conneco in the block.

Measurey was a hig percentage gainer adding 2% to 2714 after it said it received a substantial contract from Boise Cascade, although it did not specify the amount.

Also active were Digital Equipment, up two to 515, Polamid Corp., up 1½ to 40½, K-Mart, up ¼ to 26, Boeing up 2½ to 52½ and Eastman Kodak, up 1½ to 58. Stock Exchange. The market-value index gained 0.88 to a record 146.49. The previous record was 145.84 May 22. Volume rose to 4.43 nullion shares from Finday's 3.76 nullion and advances led declines 437-10-258. The average price per share rose seven cents.

Resorts International 'A' gained 3% to 3% volume leader Syntes picked up % to 20% and active U.S. Filter rose % to 15%.

In Chicago, wheat, cora and soy-beans closed substantially higher and oats mixed on the Board of

Wheat was up 5 to 7% cents; corn up 3 to 3%; oats off % to up 2%; and soyheans up 3% to 12%.

Ecevit Reaches Accord With Banks on Debt

WASHINGTON, June 5 (Reuters) — Turkey has reached in agreement in principle with New York banks on reschedoling its debt. Prime Minister Bu-lent Ecevit said today.

He declined to say how much of the nation's outstanding is covered under the agreement or to provide further details. His comments were made after a 45. minute meeting with Treasury Secretary Michael Blumenthal. Turkey's short-term deht was

recently estimated at \$5-to-6 billion, including \$1.6 hillion owed to international agencies or gov-ernment bodies.

Copper Production Resumed in Zaire

KINSHASA, June 5 (Reuters) --Zaire said it had resumed copper mining in Kolwezi and has eveceded production levels achieved be-fore last month's rebel insurgency

The official morning newspaper Salongo said open pit mines, which produce three-fourths of Kolwezi's copper, were restarted last Hmrs-day and were producing 13,000 metric tons of ore a day, up front 10,000 prior to the invasion.

Underground immes had been pumped dry and would resume op-erations within three weeks, the pa-

DG-Bank Withdraws U.S. Offering halance sheet ratios. FRANKFURT, June 5 (AP-DJ)

-- Deutsche Genossenschaftbank
withdrew its planned offering of

The Fed and the Bundesbank have
considerable objections to the issuance of DM-denominated Euro-

role in recycling funds from nations with large surpluses to the most credit worthy countries running deficits. Some of them consider that it is better to start off slowly in a bear market than to have to move in a hurry in a bull market. For these hankers, Eurobond un-

equally important consideratin is that Eurobond issues represent a form of direct lending between surplus and deficit countries with the result that banks do not have to take the credits on their own books as they do with syndicated hanks loans. Hence, there is no strain on

A third reason for involvement is competitive. Over the past few years, the large Swiss and West German banks, which have been able to afford large underwriting risks because of their huge capital bases, have used their muscle to win away business from the tradi-

tional investment hanks with small capital bases. And, of course, the large U.S. commercial banks are in a position to do the same thing. Among those U.S. banks ex-

panding their Euroband operations is Bank of America International Ltd., the London-hased investment bank subsidiary of Bank of America Corp. Sources within the hank say they expect to start a large Eurehend trading operation in the Autumn. Initially, it is expected that the hank will make a market in about 200 Eurodullar bond and note issues.

Citicorp International Bank in London, which already makes a market in about 150 Eurodollar issues, expects to broaden its list as a new issues come into the market:

Chemical Bank, which recently entered the investment hanking business by acquiring London Multinational Bank and changing its name to Chemical International Bank, also has plans for its subsidiary to start a Eurobond trading

The only issue under offer was quasi-private placement in Italy for the European Coal and Steel Community. The \$50 million, nine-year issue is being offered at 99.75 bearing 8.75 percent to yield 8.79 percent by Banca Commerciale Italiana and its associates who have underwritten the full amount.

1977 was another good year for Ennia, one of the largest insurance groups in the Netherlands.

Income increased from each of our three main areas of business, continuing our record of balanced overall growth both at home and overseas.

Between 1973 and 1977, total receipts have risen from Dfl.906m to Dfl.1,850m, an annual average increase of 20%.

Profits have made good progress too: from Dfl.22.2m in 1973 to Dfl.42.9m last year.

We propose a dividend for 1977 of Dfl. 7.50 (1976: Dfl.6.50) per ordinary

Strength through diversification We operate internationally in three main areas: life assurance, general insurance and some non-insurance but related fields such as personal loans, mortgages, property development and holiday centres—where our marketing strength, expertise in investment analysis and property man-

agement can be profitably employed. Life assurance accounted for 61% of our business last year, gross receipts have risen from Dfl.631m in 1973 to Dfl. 1, 125m in 1977.

General insurance produced 32% of our income in 1977 and has increased from Dfl.242m to Dfl.596m in the past five years. Results were an

improvement on the previous year. Other countries and inward reinsurance have performed well.

Non-insurance activities have grown to 7% of our business, from Dfl.33m in 1973 to Dfl.128m in 1977.

Further growth overseas

At the moment, most of our revenue is generated within the Netherlands, a home market that provides, overall, a sound and profitable base.

But our overseas strength is dereloping well.

We have offices, subsidiaries and

Belgium, the United States, the Carribbean Republic of Sunnam and

the Middle East. They now contribute 20% of our total gross receipts (1976: 18%) and we plan to increase that percentage still further. Overall Ennia have arecord of producing sustained, balanced growth at home and in other countries to the benefit of both shareholders and policyholders.

Our results, just released, show the picture: with gross receipts, net profit and dividends all increasing.

COMPAGNIE FINANCIERE DE SUEZ

At the annual general meeting of May 23, 1978, the shareholders approved the accounts, as well as the balance sheet for the liscal year 1977. The dividend to be distributed has been set at Fr.1.7 per share. This dividend, being paid on 10 per cent higher capital, thus, has been increased by 10%. Payment will be made against remittance of coupon ar 35 from Monday, June

In this address to the shareholders, Michel Caplain, chairman of the compa recalled that, even if the political outlook in France has become brighter, onomic and social problems still remain. French economical policy has to be carried out in a difficult international and domestic environment As far as international field is concerned, it is not a question of overcoming a

temporary difficult situation but of coping with a radical change due to energy price disruption and to a new international division of labor. M. Caplain also pointed out that a revival of the French economy should be based on the liberalization of prices and on a larger body of shareholders. With regard to the Suez group. M. Caplain said that consolidated income in 1977 amounted to Fr. 400 million against Fr. 381 million in 1976. This is equivalent to Fr. 45 per summer against Fr. 43.15 in 1976. Financial revenues for 1979 amount 45 for summer against Fr. 43.15 in 1976.

for 1978 appear to be favorable. The estimated value of the Suez share on March 31, 1978, calculated according to the usual procedures of the company, amounts to about Fr. 550.

BOOKS

JESUS THE MAGICIAN By Morton Smith. Harper and Row. 210 pp. \$12.93.

Reviewed by John Dart

THAT Jesus of Nazareth was a tells of a "certain magician, a lea-faith healer and an exercisi ish false prophet, named Bu-Jesus," who was close to a proconhe possessed an evil spirit named Beelzebub, few knowledgeable Christians would deny. It's there in the New Testament.

That the works and ministry of Jesus can be understood best as those of a first-century magician will undoubtedly meet great resistance among those for whom the nature of Jesus matters most.

Morton Smith, a Columbia Uni-

versity historian at home in New Testament studies and Hellenistic literature, nevertheless amasses sig-nificant evidence from pro- and anti-Christian sources of antiquity plus parallel lore from Greek mugical papyruses to support his case.

Jesus is subject to endless analyses, much of them just as well for-

gotten. But Smith's picture of Jesus the magus is not likely to vanish like so many theories of a more

speculative type.
Unlike Hugh Schonfield ("The Passover Plot" and others), Smith uses many primary and secondary sources and tests his research in demanding scholarly circles. If Smith is somewhat of a maveriek, it is be-cause of his relative adventurous-

ness in reaching conclusions and broaching possibilities.

Smith first suggested that Jesus functioned as a magician in two books published in 1973, "The Second Corporate Corporation of the second control of the second c cret Gospel" and its scholarly version. "Clement of Alexandria and a Secret Gospel of Mark." They dealt primarily with part of a letter he discovered in 1958 in a desert monastery south of Jerusalem.

Written on the back pages of a 17th-century volume, the letter purported to be a copy of a letter by Clement of Alexandria, a secondcentury churchman who told of portions of the Gospel of Mark which were "read only to those who are being initiated into the great mysteries. Some scholars were frankly skep-

tical about the authenticity or alleged earliness of the Mark," Many have sco Many have scoffed at Smith's theories which arose from the text's study — that Jesus the magician initiated followers in a seventh-night baptismal rite which involved a hallucinatory ascent to the heavens. Smith's hints of erotic overtones and that a Christian libertine tradition originated with Jesus himself also drew fire frum schulars.

In his new book, Smith concentrates almost totally on his thesis that Jesus was a magician.

Magicians were apparently a well-knnwn phenomenon in and around Palestine. In the New Testament Acts of the Apostles, the reader meets two magicians whose powers are no match for the power. of Jesus as inherited by the apos-tles. Simon Magus of Samaria reportedly was dazzled by the exorthe apostle Philip and, as a result, became a believer. (Later church fathers, however, were to regard Simon as a "bad Samaritan," as it were, for supposedly starting the Gnostie heresies.)

The Acts of the Apostles also

BRIDGE

By Alan Truscott

On some occasions, a defender can judge at an early stage what problem the declarer will have to face, and prepare his counter-measures. A striking example is the diagramed deal.

South opened four spades with a hand on which most experts would be content to bid three spades. North raised to six spades, reaching a slam that would have been easy if South had held the eight-card suit that his bid suggested. As it was, South needed to do a little guessing to make 12 tricks: To avoid a club loser he needed to score two diamood tricks without losing two tricks in that suit.

West led the heart king, which was taken by dummy's ace. South saw that he would have to guess the diamonds eventually. He decided to postpone the decision by run-ning five rounds of trumps. West and dummy threw three hearts, while East gave up both his hearts and one club. The position was now this:

NORTH 6 K 1992 ♣AK5 WEST EAST ♥Q ♦ **A**875 ◆J84 ◆J19**◆Q873** SOUTH 498 ♦Q2 ♣842

When South now led the diamond queen. West was ready: He ducked smoothly. If he had taken the ace. South would probably have played the king at his next opportunity and played for East to have the diamond jack. This play is right on the percentage basis, by a small margin, and would have succeeded. As it was, South led his second dia-mond, and West ducked again. without any revealing hesitation.

Not unnaturally, South finessed the ten, and when this lost to the

BCk, the slam became unmakable. South's strategy in leading out several rounds of trumps before attacking diamonds was perhaps wrong. He was hoping to glean some clue to the diamond situation. but what happened was that the debut what happened was that the de-fenders received some and found the best defense.

If South had led a diamond at the fourth trick, either low from dummy to queen or the queen from his hand, it would have been a little harder for West to duck smoothly.

Fine

sul in Cyprus. The apostle Paul said to be filled with the Holy Spirit, is pitted against this magician for the belief of the procomal Capling him "son of the devil." Paul curses Bar-Jesus with temponery blindness and wins the day with the Roman official.

Smith cautions that while there

accounts and those in the gospels many times, the more important consideration is the ambivatella way that New Testament authors way that New Testament author-handled accusations of magic-against Jesus and how other magi-cians were pictured. Jesus' enring of demonics and cursing fig trea-stories of walking on water and the use of Jesus' name to work wonders were not denied by the early church, but explained as the words of the son of God. of the son of God:

The author is not suggesting that Jesus was a faker or pursuing a dis-bonorable career. Moreover, the distinction made by some liberal scholars between the "Christ of faith" and the "Jesus of history" a a gross exaggeration, Smith says, h wasn't just the later church which saw Jesus as divine, he says. The saw Jesus as divine, he says. The evidence requires one "to recognize the possibility that one of the first to believe in "Jesus the Christ was Jesus himself." In popular thought then, "son of God" and "magician" were practically interchangeable terms, he asserted.

Yet, whether Jesus called himself the Messiah is another mister.

the Messiah is another matter. While the Messiah is another matter. While the Some early Christian texts from the Nag Hammadi Library, discovered in 1945, specifically the Gospel of Thomas, the Dialogue of the Savonand the Anocraphon of James and the Anocraphon of James and and the Apocryphon of James, de not use the title Messiah-Christ at

all for Jesus.
Smith once said privately that he did not cite much material from the Nug Hammadi Library because of its many Gnostic texts -- which would have provided ammunitied in Smith's mind; for critics to

dismiss his research.
"Jesus the Magician" already his
ammunition for conservative crit ics. Smith gives some credence to opponents charges that Jesus was maditional in the illegitimate son of a Galilean peasant winnan by a Roman sal-dier named Pantera.

Smith also sees magical elements in the Lord's Prayer and calls the Eucharist "an unmistakably magical rite." Drinking the blood and eating the body could not derive from the Jewish Passover seder. Smith says, but it fullows magical tradition as the way in which they magician god would unite followers with him in laws.

with him in love. "Jesus" resurrection, ascension and miscellaneous post-resurres. tion activities belong to the psychopathic histories of his disaples. Those histories must have been shaped by their experiences with Jesus," Smith writes. A blunt way. to say what some scholars say more; circuitously and what skeptics say

As Giants Beat Expos, 3-2 Tigers 6, Twins 4

At Detroit, Jack Morris picked up his first victory of the year when John Wockenfuss snapped a 3-3 tie with a run-scoring single in the sixth inning to lead Detroit to a 6-4 victory over Minnesota. Errors by Hosken Powell and Dan Ford gave Detroit three of its runs.

Royals 13, White Sox 2

At Kansas City, Darrell Porter went five for five and John Wathan and Al Cowens each knocked in three runs to power Kansas City over Chicago, 13-2.

Rangers 9, Blue Jays 5

At Toronto, Al Oliver drove in four runs and Mike Hargrove drove in two and scored twice as Texas coasted to a 9-5 victory over Toron-to. Dock Ellis, with relief help from Steve Comer, went six innings to notch his fourth victory against two

Brewers 12-9, Indians 7-4

At Milwaukee, Sixto Lezcano hit a three-run home run, Paul Molitor hit a two-run homer and Sal Bando hit one with nobody on, leading Milwaukee to a 9-4 victory over Cleveland to complete a doubleheader sweep. Milwankee broke a four-game losing streak by winning the opener, 12-7, as Dick Davis hit his first bases-loaded home run.

Orioles 4, Mariners 1

At Seattle, Ken Singleton drove in all four runs with a two-run homer, a double and a single and left-hander Mike Flanagan won his seventh game as Baltimore heat Seattle, 4-1.

still for sole

"I don't think be knows Affirmed from any other horse," somebody else said. "And when be loses by o neck or a head, do you think he knows

The Great Unknown Did you ever bear of a horse named Sands of Pleasure!" a man asked. Nobody had. Joe H. Palmer wrote about Sands of Pleasure ever so long ago in a discussion of the comparative intelligence of animals. The piece is io a book called "This Was Racing" which may still be avoilable from the Henry Clay Press of Lexington, Ky.

Joe represented however have be accorded there were

ton, who swapped his place in the St. Louis out-field for a seat behind a microphone, "it might just, about finish Alydar. Wouldn't he get the idea that

"I don't know." Kiner said, "but some horses are competitors. Take an athlete like Affirmed. He

Joe respected horses but he conceded there were some tricks they couldn't be taught. He said a horse couldn't stack boxes on top of one another to reach a bunch of bananas on the ceiling because he had no hands to lift the boxes and he didnit like bananas, anyway. He said a horse couldn't be taught to sit up on his haunches and beg because it was difficult to support him that way and it was a damaed undignified position, which horses realized and politicians didn't:

However, Joe suggested that the story of Sands of Pleasure might have some bearing on the argument that horses just ran because they were bred and trained to run and didn't have any idea of what the racetrack was all about.

Sands of Pleasure was by Fair Play, later the sire of Man o' War. He was a stakes racer in his youth but as he grew older he dropped down into the claiming rank. One day he was beaten by a nose on the post or, at least the placing judges said he was. This was in the days before the photo finish

A Horse Who Knew Winners

camera, when the judges hung up three numbers and hoped for the best, like umpires. NEW YORK, June 5 (NYT) — Making small talk in Shea Stadium, Ralph Kiner of the proad-When Sands of Pleasure cantered back to the cast team said: "Who's going to win the Belmont?"
"Pay no attention to me," a guy said, "but I still have to give Alydar one more chance."
"I Affirmed beats him again," said Mike Shan-

finish line his jockey, seeing his number posted in second place, steered him to the outside rail to dismount. Sands of Pleasure raised holy hell, trying to throw the rider, rearing and kicking out at everybody and everything near him. This dis-turbed his trainer, for the Fair Ploys were a headstrong lot and some grew moody as the years overtook them. When that happened, their racing days

were just about over were just about over.
After a good deal of thought, the trainer put
Sands of Pleasure io a race where the borse was
elearly over his head. Beaten off by several lengths.
Sands of Pleasure pulled up quietly and never even glanced toward the winoer's circle when he was

unsaddled out on the track. "I think," the trainer said to himself, "this tells

me something."

He waited until he found a race that he thought would fit his horse. Then he told the rider: "If you get off clean and nothing happens, I think you'll have a pretty fair shot. But if you do win, don't take him to the winner's circle. Ride him over to the outside rail and unsaddle there."

· Won Eased Up

Sands of Pleasure broke on top, held his field and won eased up by a length or better. Pursuant to instructions, the jockey brought him back and pulled up facing the rail. Afterwards he swore that the horse turned and looked him in the eye. Then Sands of Pleasure took the bit in his teeth and

walked into the winoer's circle. So there it was, Joe Palmer said. In those days it was an article of faith with beaten horse players that placing judges were purblind incompetents of low moral standing, and there was no photo finish picture to change this view. It was obvious that Sands of Pleasure subscribed to this opinion after that nose finish, which proved him the intellectual equal of o \$2 bettor. In the second race he accepted defeat philosophically. In the third he knew bloody well he was the winner and was having nn non-

sense about it. "I'm not sure how much Alydar and Affirmed know about that rivalry of theirs," the man said at Shea, "but they are both race horses."

"I hit some bad shots but six inches out today is going to be six inches in oext week." Coonors said. That's why I got here so early." Major League

Art Buchwald

Better Postage

proud of it.

I talked to one of the men who developed the 15-cent stamp and he considers it one of the greatest breakthroughs in

delivery since the invention of the zip

code. "For we've dreamed a 15-cent stam but it is one the: to have the co..cept and anoil 'r
to make it a re: ty. Ever since t people upstairs

Buchwald id they wanted it. we have been vorking day and night to develop one according to

their needs."
"What spec ically did they

want?" "They said they wanted a stamp lighter in weight so we could get more letters on an airplane. At the same time it had to take a beating from hail and snow and sleet. The stamp also had to be flexible enough to bend when it was bought in rolls instead of sheets. And the most important requirement was that it could not be used again when the post office failed to can-

"How did you solve the last problem?"

That was the most difficult." he said. "The post office bas been los-ing between \$10 million and \$20 million a year because when people got a letter with a stamp that was not canceled they steamed it off and used it again. This is a federal crime, but very few federal attorneys will prosecute.

"They say it is too difficult to

Manure Conceals Pot

MIDAS MUFFLER SHOP. Paris, Te 672.46.52; Nice, Yel.; 55.38.74.

W ASHINGTON — While find a jury that will convict some-plained about a first-class stamp going up from 13 cents to 15 cents, the U.S. Postal Service is very proud of it. easy assignment. The first thing we developed was a glue with an ex-plosive base. When a person tried to pry off an uncanceled stamp from a letter, the stamp would blow his hand off. We thought we had the solution but the Occupational Safety and Health Administration

raised objections so we had to go back to the drawing board."
"That was tough luck," I said. "because it would have done away with the crime."

Then we came up with a blue dye. If you tried to get the stamp off the envelope you would be cov-ered from bead to foot with this indelible dye, and then our postal in-spectors would be able to make a

foolproof arrest."
"The people upstairs didn't go for that?" They did, but the postal workers kept getting the dye all over their clothes and wanted the service

to pay for new uniforms." "What was the answer?" "A secret glue that makes it impossible to steam the stamp off. It self-destructs if anyone tampers with it after it has been stuck on an envelope. It's the biggest break-through since the invention of air

"Will the oew 15-cent stamp speed up the delivery of mail?"
"I should hope so. With less weight and more stable corners, our new 15-cent stamp could break the record from New York to Washingtoo by 45 miontes. A first-class letter can now get to any place within 500 miles in less than four days."

"That soon?" I said in amaze-

"Our only problem at the momeot is that many people are putting the old 13-cent stamp and two 1-ceot stamps on their letters. This means that our people have to cancel three stamps instead of one. That will slow delivery down for a while. But once there are enough 15-cent stamps in circulation, you'll never have another complaint about the postal service again."

"There is a rumor that you people are now working on a 20-cent manjuana was coocealed under a first-class stamp that would make the 15-ceot stamp obsolete in another year."

'Oil is not thrust under your nose here. I think

I've only seen two Stetsons, and they

were worn by Scotsmen. A lot

of the Americans wear kilts.'

Aberdeen: A Boom Town at Age of 600

By Fred Bridgland

BERDEEN. Scotland. (Reuters) — Aberdeen is Britain's only boom city. It is Europe's oil capital, and its young businessmen dream that it will grow to rival Houston.

Down by the harbor, crammed with brightly painted vessels which ferry supplies non-stop to oil rigs out in the chilly waters on the North Sea, is a very ordinary looking newspaper

Ordinary, that is, except for its name. The shop sign pro-claims in huge capitals "Bonan-za": That is the name of the game here with Aberdeen prospering as more and more British North Sea oil fields are opened. Oil from the ninth field hegan pumping ashore in April and by the early '80s Britain will be self-sufficient in supplies of the precious liquid.

Aberdeen is, however, taking its prosperity quietly. The city is six centuries old and has deep. solid traditions based on the church, its 500-year-old university and a deep-sea fishing indus-try which is now io acute depres-

It has none of the brasbness or ramshackle rawness of a new Broken Hill, Klondyke or Kimberley. The visitor looking for tell-tale signs of moral decay has a difficult time. There are no obvious wild gambling parlors or brightly lit brothels where rig workers and divers, ashore from hard-working stints out io the North Sea, can spend their fat wage packets.

Contrary to the legend which has grown. Aberdeen's sober

streets, lined with granite build-ings, are not thronged by Texans wearing Stelsons.

"Oil is not thrust under your nose here," says Tony Barker, a pin-striped English oil executive who is the representative in Aberdeen of the Philips-Pye offshore group. I think I've only seen two Stetsons, and they were worn by Scotsmen. A lot of the Americans wear kilts."

Little America

But the presence of 6,000 Americans associated with the oil husiness is noticeable among the 215.000 Aberdonians. Just outside the city they have their own country club. It's their little part of America, a retreat from the natives," says Barker, "We non-American oilmen get invited out there about twice a year for harbecues.

The city's American school has more than 500 pupils and the new Sberaion Hotel, owned by an American who lives in a 300-year-old castle in the Scottish highlands, has clocks which show Houston time as well as the time in Scotland.

Spence Rae, once a bornely little grocery shop selling tradi-tional Scottish working-class fare like minced beef, baggis and scones, has become Spence Rae's American Food Store. Oo a weekday, the accents there cover the 3.000 miles across America from Boston Harbor to San Francisco's Golden Gate. It is almost certainly the only shop in Scotland advertising ice cubes

for sale in mid-winter. Executives from Italy, France, Holland and West Germany are also cashing io on Aberdeen's oil boom. Many gather in city ho-tels and bars when they are not working at the offices of 17 international oil companies with North Sea headquarters here. Some companies have moved into and modernized stately Vic torian granite houses while others have built skyscrapers for

Getting Rich

Other Aberdonians than Spence Rae are getting rich, too. A familiar sight on Union Street, the sedate main commercial area, is Ian Maitland's white Rolls-Royce.

Maitland, 35, runs one of the most profitable offshore supply companies in the city, procuring a wide range of goods for oil companies on short notice. After building up a large office cleaniog business, based mainly on oil company offices, Maitland started his new business just two years ago and in his first year turned over more than \$1 mil-

The early boys in the husiness were Americans." Maitland, who left school at 15. "It all seemed very high-powered. But I realized it was a

There was no reason why a Scot shouldn't get a slice of the

Maitland's big break came when an oil company asked if he could provide thermal underwear and protective clothing for 1.500 rig workers within a week. "I didn't know a thing about supplies, but I went to the people who did know," he says. "I made it in time and gave the company a sense of urgency and quality about myself." **Zero Unemployment**

Aberdeen, oow the only area of Britain where there is virtually zero unemployment, had in the past many jobless. Many young men headed south to Eng-land to find work.

Maitland is now setting up a new company to challenge the traditional American stranglebold on the maoufacture of drilling tools and other high quality oil-engineering products.

It is this kind of enterprise

and confidence that the young professional Aberdonians who run the city's Junior Chamber of Commerce want to encourage to ensure that Aberdeen continues to boom after the oil reserves are exhausted at the beginning of the next century.

Sidney Barrie, a lawyer in bis thirties, has been appointed by the chamber to head a team working out how Aberdeen can become a permanent oil center.

"The real oil future is in engineering." he says. "If we can manufacture oil tools we bave a greater chance of being regarded as an oil center, not just as a supply and service base.

"We've built up an expertise

here. Though it was first imported from America, we don't want it to be lost. At the moment the giant Middle East oil fields are serviced from America. Why not from here? It's a lot nearer,

"There's no reason we shouldn't become another

PEOPLE: Anita Bryant, Husband Plan Therapy Centers

Singer Anita Bryant and her husband Bob Greene say that they plan to open a series of counseling and therapy centers for homosexu-als throughout the United States. The first one will be opeoed in Miami, but no date has yet beeo set. In preparation for the project. Miss Bryant — who has led a nationwide campaign against accept-ance of homosexual practices - is currently meeting at her home in Miami with six persons described as experts on homosexual counseling. Her plans drew quick condem-nation by Miami homosexual rights leader Robert Kunst who said, "She needs more counseling than anybody." But Greene said he and his wife decided on the centers after receiving thousands of letters from homosexuals "who are beginning to realize that there is a way out of this thing for them." mately we hope to have raoches and farms so that they can change the lifestyles they've become addicted to." Greene said.

Chemist Linus Pauling says that his theories on the medical value of

vitamin C are ridiculed because

they challenge myths that have dominated health sciences for dec-

ades. Pauling, a Nobel Prize winner, has championed vitamin C

to help prevent and treat caceer, colds and olber ailments. Pauling said at a symposium, "Nutrition and Health: Myths and Realities,"

in San Francisco that many recog-

nized authorities on nutrition have

publicly derided the value of vita-min C, and many physicians and scientists bave criticized his theo-

ries. "In many fields you have to wait until the old professors have

died off and a younger generation takes over." be said. He said re-

search is now beginning on the

vitamin's effects. New research is being funded by the National Can-

cer Institute, which also is studying

whether massive doses of the vita-
